

ACKNOWLEDGEMENTS

Tetra Tech EM Inc. (Tetra Tech) prepared this Handbook with funding from the U.S. Environmental Protection Agency (EPA) administered through the Colorado Department of Public Health and Environment (CDPHE) Pollution Prevention Program. Throughout the project, Tetra Tech worked with Arapahoe Basin (A-Basin) and the Aspen Skiing Company (ASC) to understand the environmental aspects of ski area operations and evaluate various pollution prevention opportunities. A-Basin and ASC dedicated significant time and resources for the development of this handbook and toward reducing the environmental impacts of their operations. Kirk Mills and Michael Keefe managed the project for CDPHE and Tetra Tech, respectively. Principal project engineers were Caitlin Bowman of Tetra Tech and Judy Dorsey of The Brendle Group, Inc. Numerous other individuals, particularly Geraldine Link of the National Ski Areas Association and John Gitchell of Vail Resorts, contributed to the creation of this Handbook. In addition, Tetra Tech and CDPHE acknowledge the following individuals and organizations that provided valuable input to this Handbook.
